## Antioch and Grant to Battle Here Tomorrow Evening in Basketball

### Sequoits Lost First Game To Northbrook Here, Score 42-24

Antioch High will play its second home basketball game of the season tomorrow evening with Grant Township High as its opponent.

Both teams lost decisively in their opener, the Sequoits losing to Northbrook here 42 to 24 on Thanksgiving eve, and Grant losing to Barrington by a similar margin. Buchta will start the game this time at center having become scholastically eligible.

Weakness in the offense accounted for the loss to Northbrook, Coach Maurice Kruzan said. The Sequoits were having trouble making their open shots. Their defensive work was quite satisfactory for this point in the season.

Coach Kruzan is spending practice nights in scoring plays and believes his boys will be able to win from Grant.

The Papposes lost to Northbrook by the close score of 25 to 22 in the curtain raiser.

A crowd so large that spectators lined the walls saw the Northbrook game.

On Saturday evening, the Antioch teams will play Barrington there.

Ground was broken in Libertyville yesterday for the construction of the Illinois Bell Telephone company's new \$1,320,000 dial telephone exchange.

When the two-story brick and limestone building is completed next summer and the switchover takes place the following year, the exchange will relieve the Antioch exchange of its present heavy load. Fox Lake assistance and long distance calls now handled by the overburdened local exchange, will be cared for by Libertyville operators.

### Taxpayer's Mass Meeting Date For Dec. 10, Waukegan

Springfield, Ill.—Predicting that minority pressure groups for increased spending of taxpayers' money will swarm in unprecedented numbers on our Illinois General Assembly and Federal Congress when they meet again in January, Walton R. L. Taylor, Executive Secretary of the Lake County Civic League, warned Lake County taxpayers that "you haven't seen anything yet."

Taylor urged all Lake county taxpayers to attend the mass meeting to be held in Waukegan on Friday evening, December 10, at 8 p. m. in the basement of Christ Church Parish House. The meeting is sponsored jointly by the Taxpayers' Federation of Illinois and the local affiliate, the Lake County Civic League.

"We already know of more than 150 propositions affecting taxpayers probably to be considered by the next session of our Illinois General Assembly—to say nothing of our Federal Congress," Taylor said. "Some of these propositions are of major importance to our pocket-books. We taxpayers have got to let our Senators and Representatives know how we feel, if good legislation is to be passed and bad legislation defeated."

State Senator Ray Paddock and State Representatives Thomas A. Bolger, Nick Keller and Harvey Pearson have been invited to the meeting.

Both sides of major problems of tax legislation will be presented at the meeting, and a ballot taken on each proposition to find out what the taxpayers of Lake County want, Taylor said. Another purpose of the meeting is to develop a taxpayer action program to see that good legislation is passed and bad legislation is defeated.

More than 350 farmers, workers, housewives, businessmen and industrialists turned out to a similar meeting at Freeport last week.

### Antioch Area Asked to Participate in Abraham Lincoln Food Program

#### Churches Asked to Cooperate in Providing Train of Supplies

Announcement was made this week that all towns in Lake County and also the rural people are participating in the Christian Overseas Relief program. This plan, known as CROP, is a project whereby various food items are accepted to be shipped overseas to the needy people. It is sponsored by the Protestant Church World Service, the Catholic Rural Life, the Lutheran World Relief and some Jewish agencies.

The Rev. Paul Turk, county chairman, announced that all the churches are being asked to cooperate. The Farm Bureau of Lake County, is lending its assistance through Mr. Ray Nicholas, Farm Advisor, and many of the Farm Bureau members are donating milk. The County schools, under the direction of Mr. W. C. Petty, County Superintendent, are also cooperating.

The Abraham Lincoln Christmas Food train will leave Illinois and several other states on December 22. It is expected that carloads of food items collected will be dedicated and shipped from the various counties on Christmas Day. Illinois alone expects to collect 300 carloads.

Part of the shipment will be made to Asia and part to Europe. They need our help. Europe's agriculture will not approximate pre-war averages until 1952. You can plant a crop every year but people starve only once.

Cash gifts may be sent to Mr. R. J. Dwyer, Treasurer of CROP, at Mundelein, Illinois. It is hoped that there will be a welcome response from the people of Lake County.

### Ford Show Room to Be Used as Auxiliary P. O. During Christmas Rush

Use of the Ford garage show room as temporary auxiliary quarters for the Antioch post office during the Christmas rush was announced today by Postmaster Roy Kufalk.

Three rural carriers will have their sorting tables there and all parcel post and third class mail will be handled there also.

First class mail will be handled at the regular office and transferred to the rural carriers, and mail from the auxiliary office will be moved to the regular office for final shipment.

This is the first time additional room has been obtained for the local office, but it is now necessary because of the greatly increased volume of business.

Postmaster Kufalk made the following requests of patrons:

Mail early to insure delivery before Christmas.

Address mail plainly, and use the address Antioch instead of merely "city."

If you are a concern mailing large numbers of calendars or other materials buy pre-cancelled stamps.

Buy stamps and put them on the letter or package if you are a rural patron and don't leave to the carrier the job of attaching the stamps.

Again, mail early.

The sewer to the sewage disposal plant has been installed and the power line to the plant strung by the Public Service Co., as projects commenced during the summer by the village near completion.

The paving of South Main st., is to be completed today and only the curbing remains to be put in. One big obstacle in this project was the removal of a large tree in front of the Episcopal parish house.

A report on these projects probably will be made by committees at the regular meeting of the village board of trustees next Tuesday evening.

The meeting will be the last for Trustee Winsor Dalgaard, who is resigning having moved to Lake Villa. President George B. Bartlett said that although he has the power to appoint a successor to Dalgaard to serve until election time next April he might leave the position vacant.

### Postal Regulations Concerning Lotteries Explained by Kufalk

#### Postmaster Kufalk Requests Early Mailing for Holiday Delivery

Since much misunderstanding of postal regulations regarding transmission of certain matters through the United States mails seems to be evident, Postmaster Roy I. Kufalk this week furnished the News with a direct quotation from the Postal regulation which controls matter relating to lotteries, games of chance and other similar matters.

The quotation states, "Letters, postal cards, circulars, or packages concerning any lottery, gift enterprise, or similar scheme offering prizes dependent in whole or in part upon lot or chance; and tickets or parts thereof, or papers, certificates or instruments purporting to be or to represent tickets, chances, shares or interests in or dependent upon the event of such lottery, gift enterprise or similar schemes, and checks, drafts, bills, money, postal notes or money orders for the purchase of tickets or parts thereof or of shares or chances in such lottery, gift enterprise or scheme; and newspapers, circulars, pamphlets, or publication of any kind containing advertisement of such lottery, gift enterprise or similar scheme or containing any list of part or all of the prizes drawn or awarded therein are unmailable."

It may readily be seen from interpretation of the above paragraph, that matter that pertains to a lottery, game of chance, drawing or similar gift scheme, cannot be accepted for transmission through the mails. There is no doubt that many pieces of mail are received by the postoffice and get through undetected, but any such unmailable matter which is detected will not be accepted for mailing according to Postmaster Kufalk.

The regulation, which is perhaps more applicable to Newspapers than on other mail, because it is more readily detected, precludes the possibility of a newspaper carrying the advertisement of a lottery, or the winners of a lottery of any kind.

T. F. Matson, wire chief, of the Bell Telephone Co., said that the fire occurred at 9:45 a. m. and repairs were completed by noon.

### A Time For Reasoning

There has been an ominous increase in the fear of Russia on the part of the American people during the past few months. This is not said out of a desire to minimize the seriousness of the international situation. However, it must be remembered that it is possible to fan the flames of fear and suspicion until a nation comes to believe that war is inevitable. And once that stage is reached, war always comes sooner or later.

David Lawrence put this well when he said, "The danger in a battle of words is that it can conceivably develop into a battle of arms." It is unfortunate that American statesmen have been goaded into using language that is not often employed between countries not at war. The Russians, of course, provoked them into it. Even so, difficult as it may be to keep our tempers, we cannot gain anything by war-like talk simply because Russia employs war-like talk. To quote Mr. Lawrence again, "It is a time for restrained phrases and for persuasive argument. It is a time not for feeling but for reasoning."

We can best serve the cause of freedom abroad, in our relations with the Russians and all others, by backing up our material aid with a demonstration of the fact that democracy, as we know it, is superior to any form of super-state. We can, in other words, help combat the spread of communism by example. We must keep our people and our industries free of the governmental controls which plague Europe. And, at the same time, we must continue to work to the limit of our abilities with all nations, regardless of ideology, to maintain the peace of the world. "Fear hysteria" will never achieve that vital end.

### What's Right With The United States!

Millions of Americans seem to be apathetic toward charges that there is something basically

wrong with our governmental and economic systems, and that socialism, communism and the rest of the assorted isms have more to offer.

Edward C. Sammons, president of the United States National Bank of Portland, Oregon, touched on that vividly when he said:

"Our country is the only nation in the history of the world that has continued with its intrinsic, basic type of government since its beginning 170 years ago. . . . In those 170 years our 6 per cent of the world's population produced 25 per cent of the world's goods and possesses 50 per cent of the world's wealth. In no other country is there such opportunity as here.

"Too many people are saying what is wrong with America. Instead, we should be saying what is right with the United States. Why should capital be on trial here? Why should not socialism or communism instead be on trial, when our people are asked to provide the money and the food and tools for other nations to carry on?"

"In my time we have defended our country three times from outside invaders, but we are not defending it sufficiently from within. The working man here is able to live almost as well as a king compared with those in other countries. Other systems promise. Our people have!"

That is a fundamental truth. The American people should shout from the housetops their faith in a system that has given them unprecedented tangible benefits—and, infinitely more important, the intangibles that make for a life of freedom.

### The Low Down From Hickory Grove

I see in my crystal ball, a dark omen—looks a little like the old OPA skeleton. But it won't be called any such name as OPA—it will be a very small control this time, the Boy Wonders say—just a little supervision over a few major items like maybe wheat and steel, etc. Nothing more than that—just temporary, they say.

There is still something like an excess of one million on Uncle Samuel's payroll—left-overs from the big days of the Alphabet. These folks—useless excess baggage, I call 'em—have gotta keep something stirred up so it will look like they are busy versus just being on the pay-roll, and sittin' there with their feet on the desk. They have convinced Uncle Harry that something should be done. I must write and warn Uncle Harry again I guess—he is runnin' around with the wrong crowd.

Can you have a little control like they say, says Henry, and not have big control next? Well, Henry, I says, there used to be a fellow over in Cle-shoot off a cannon a little at a time, and not make burne—that is in Texas—and he said he knew how to such a big noise. He tried it. Well, the undertaker, after doing his very best on the remains, you couldn't even then tell, who it was—or had been.

Yours with the low down,  
JO SERRA

### Caution Illinois Motorists On School Buses

"Illinois motorists must be more careful of yellow school buses if the state is to continue its present good safety record in pupil transportation," John K. Cox, director of rural school relations of the Illinois Agricultural Association, said today.

One school district in northern Illinois experienced two accidents recently involving their school buses, Cox reported. In both cases, careless driving by motorists was said to be the cause. No one was hurt, fortunately, and in both cases the passenger car got the worst of the argument.

"The big trouble," said Cox, "is that Illinois has approximately 8,000 school buses today as compared to about 2,000 four years ago." Many well-informed people do not know that the motorist must

stop when approaching a school bus from the front as well as from the rear if the bus is stopped to load or unload passengers. Also, many people think that school bus safety precautions and regulations for paved highways do not apply to country roads.

"Safety in pupil transportation is a national and state problem," said Cox. "But in view of the fact that many communities in Illinois are getting used to pupil transportation for the first time, the safety problem is a local matter as well."

Cox expressed the need of a statewide campaign to make people conscious of the potential danger zone surrounding a yellow school bus, especially when it is stopped to take

on or discharge pupils. It might help to have more pupil transportation caution signs along Illinois highways, and perhaps a few widely publicized arrests of motorists who pass stopped school buses whether approaching from front or rear, on graveled or paved roads.

"Perhaps," concluded Cox, "we ought to change the wording of a

current expression to read, 'Drive carefully and save a life. It might be your own child's or that of your neighbor's child.'"

JERRY: "Sure nice of you to stop by, Sam."  
SAM: "Not at all. I was just finishing up my route, and decided to drive over. You been lonesome, Jerry?"  
JERRY: "Lonesome? My wife says we've had more company since I've been sick than we had all last year! Why, I think nearly every fellow at our V.F.W. Post has been over! Say... I'm sure glad you insisted on my joining up last year."

SAM: "Glad to hear you say it, Jerry. I don't think there's any finer group of men than those who've fought shoulder-to-shoulder in foreign lands. It takes more than Military Service to belong to the V.F.W. Foreign duty is mandatory. That's why our outfit is unusual."

JERRY: "I like you always say—the most exclusive club in town!"

SAM: "That's right—and the nicest, most considerate bunch of fellows I ever knew. No matter how tough things get, a man who belongs to the V.F.W. always has friends to back him!"

## Lightning Conductors

In assembling lightning conductors, it is preferable that all parts be made of the same kind of metal or of combinations of metals which will not produce excessive corrosion by galvanic action in the presence of moisture.

## Extinguish Rubbish Fires

Best way to extinguish a fire that originates in rubbish is to use approved fire extinguishers containing foam, vaporizing liquid or soda and acid agents.

## Coyote State

South Dakota selected the pasque flower as its official flower, and the ringneck pheasant as the state bird. Its motto is "Under God the people rule."

## Vending Machine Sales

Today about 20 per cent of all cigarette sales are made by vending machines, and the same is true of candy bars. An even larger proportion of soft drinks is dispensed automatically.

## Design of Snowflake

In its original unbroken, unmelted form, every snowflake has its structure and shape built in units of six. These take on an almost endless variation of design.

## Outboard Precaution

Don't spill gasoline while filling an outboard motor float. A small amount of gas may spread on the bilge and set the entire boat afire when the motor starts.

## War Vets Warned To Watch Expiration Date on Ins. Policy

Illinois veterans of World War II holding original National Life Insurance policies were warned today to watch the expiration date of their policies.

The warning came from Homer G. Bradney, administrator of the Illinois Veterans Commission, who pointed out that original NSLI policies are expiring every day and will continue to do so until December 1953.

Veterans holding such policies are urged to renew their insurance for another five-year period before the

expiration date or to convert to one of several plans available. To prevent losing their insurance, every veteran should check with their nearest Illinois Veterans Com-

mission office to ascertain the status of their insurance. The IVC office in Lake county is located at American Legion Home, Waukegan.
